SKILLS

Engines & Tools

- Unity
- Unreal Engine 5
- Git
- Perforce
- Azure DevOps
- Visual Studio
- Visual Studio Code

Programming **Languages**

- C#
- C++

LANGUAGES

Swedish – Native
English – Fluent

PROJECTS & EXPERIENCE

Featured selection. See full portfolio and technical demos at wennerberg.dev

Evergreen IT AB | Internship MAY - DEC. 2026
Custom Engine | C++ | C#

- Developed engine systems and gameplay features in C++ using a custom-built game engine.
- Used Azure DevOps and GitHub for collaborative development, work item tracking, version control, and pull request reviews.

UniTerminal - In-game command terminal | Solo Project 2025 - PRESENT
Unity | C# | Reflection | Performance-focused

- High-performance CLI using editor-time metadata baking, built for Unity.
- Supports generic type conversion, dynamic autocomplete, and bitwise flags.

PlanetFactory (Working Title) | Solo Project 2025 - 2026
Unity 6 | C# | Networking | Netcode for GameObjects

- Spherical hex-grid with chunk-based partitioning and BFS neighbor detection.
- Strictly server-authoritative architecture for all gameplay systems.
- Used UniTerminal for testing and debugging during runtime.

Slaylien - 3D Third-Person Shooter | Team Project 2025
Unreal Engine 5 | C++ | Blueprints

- JSON-serialized wave manager and 3-character swapping with automatic AI handover
- Used Unreal Delegates & Interfaces to sync stat-driven logic with modular VFX and audio systems.

EDUCATION

Game Programming SEP. 2024 - DEC. 2026
Higher Vocational Education | Futuregames Malmö

Arts Programme - Arts and Design, Specialisation in Game Graphics AUG. 2020 - JUN. 2023
High School Diploma | LBS Växjö
Scholarship: Best Final Project (“Micki Playground”)
